

ZM: Hawksoft / AVA Notes

🕒 Started at 11:29AM on 28 Jan 2026, lasted 23m

Key Points

- AgencyVA operates with approximately 100 virtual assistants who get insurance licenses and live in Puerto Rico, taking advantage of the territory's status within the United States.
- Wess Anderson shared that AgencyVA previously built curriculum for another AMS provider who later stole their modules after a few months of payment, disputing charges and starting their own VA division.
- Paul Moys vouched for Hawksoft's integrity and encouraged the partnership, assuring that Hawksoft would not engage in similar unethical practices.
- Hawksoft confirmed they have no plans to enter the VA space and prefer working with partners, with leadership including Paul Moys and Darren Defu appreciating the AgencyVA relationship.
- AgencyVA partnered with BYU to offer their virtual assistants accredited degrees, creating an opportunity to provide highly educated VAs to insurance agencies.
- A previous initiative to provide ten BYU-graduated VAs trained in Hawksoft through a webinar fell through due to internal management issues at AgencyVA, but the VAs were eventually placed with Hawksoft-using agencies.
- Dan Nash, coming from the agency world with experience in Fort Myers and Central Florida, attributed 14 million in premium written over 18 months to the hard work of virtual assistants.
- Agency V University's LMS focuses on practical application rather than theoretical knowledge, providing in-depth policy knowledge training for both licensed and unlicensed VAs.
- The training system includes AI-backed simulators that allow VAs to practice in a sandbox environment, learning through repetition without risking client exposure.
- AgencyVA's four-week new hire training program is conducted 100% within the Hawksoft system, with VAs learning all mechanics and navigation specifically on that platform.

- Wess Anderson emphasized that their LMS differentiator is building courses for practical application based on years of front-line agency experience rather than theoretical licensing knowledge.
- Two potential partnership routes were proposed: AgencyVA creating a paid subscription-based solution for Hawksoft, or helping Hawksoft build their own training curriculum.
- Revival of the webinar initiative was identified as a priority to showcase the partnership and provide trained VAs to the Hawksoft community.

Action Items

- Dan Nash to create and send a proposal to Hawksoft regarding the LMS solution after the call concludes - Dan
- Dan Nash to gather information about the previously planned webinar with ten BYU-graduated VAs and coordinate with Hawksoft to reschedule it - Dan
- Dan Nash to identify the appropriate contact person at Hawksoft who is now handling the Agency VA relationship for future coordination - Dan
- Dan to schedule a webinar to showcase trained virtual assistants to Hawksoft partners and coordinate the logistics for presenting the available VAs - Dan
- Dan to gather information from the leadership SA meeting regarding the webinar initiative and provide updates on the Hawksoft relationship management - Dan

Summary

Agency V University Learning Management System Overview

- Dan presented the current LMS interface which represents version three of their learning management system developed over nearly three years
- The system has evolved significantly from basic consultation training to a comprehensive platform
- A new interface with enhanced features is launching within weeks and will include expanded content and functionality

- The platform is built around specific modules covering different lines of insurance with in-depth policy knowledge training
- Virtual assistants receive testing at every step of their progression through the modules
- Both licensed and unlicensed VAs are trained to achieve nearly equivalent proficiency levels in insurance tasks
- Policy knowledge training focuses on accuracy, timeliness, and mitigation of errors and omissions exposure
- The system emphasizes practical application over theoretical learning, recognizing that insurance work is mastered through repetitive hands-on experience

Hawksoft-Specific Training Integration

- Agency V has unprecedented sandbox-type access to Hawksoft's system for training purposes
- The new LMS includes dedicated Hawksoft-specific training modules that are currently being uploaded
- Their four-week new hire training program now operates 100% within the Hawksoft environment, replacing a previous AMS platform
- Virtual assistants learn quoting, note-taking, and all unlicensed VA mechanics directly within Hawksoft
- Trainees work in actual Hawksoft system environments rather than just theoretical modules
- Simulators have been created for various tasks within Hawksoft to allow continued practice and skill development
- The training philosophy emphasizes learning one AMS thoroughly to understand navigation principles and documentation requirements that transfer to other systems

Previous Partnership Challenges and Trust Building

- Agency V experienced a significant setback with another insurance management system vendor who stole their curriculum after a few months of payment
- The previous partner disputed charges and openly admitted to screenshotting and taking all training materials before launching their own VA division
- This experience made Agency V cautious about new partnerships and intellectual property protection
- Paul Moys vouched for Hawksoft's integrity and encouraged the partnership development
- Hawksoft representatives assured Agency V that they have no plans to enter the VA space and prefer working with established partners
- The partnership with Agency V is considered too valuable for Hawksoft to jeopardize through competitive actions

BYU Partnership and Degree Program

- Agency V has established a partnership with Brigham Young University through direct contact with Mormon Church leadership
- This collaboration enables virtual assistants to earn BYU-accredited degrees through their training program
- The partnership represents a significant educational credential enhancement for Agency V's workforce development
- This accreditation adds substantial value to the training program and differentiates Agency V's offerings in the market

Webinar Initiative and VA Placement

- Hawksoft previously requested ten BYU-graduated VAs who completed both LMS and Hawksoft training for a placement webinar
- Agency V agreed to cover all costs while Hawksoft would conduct the webinar to connect trained VAs with potential agency clients
- The initiative was planned for October but fell through due to personnel changes at Agency V, with no one picking up the relationship management

- Agency V has continued paying for the trained group of ten VAs who have since been placed with other Hawksoft-using accounts
- Wess Anderson expressed strong interest in restarting this webinar program as a valuable partnership opportunity
- The webinar format is seen as beneficial whether three or all ten VAs find placements through the program

Partnership Proposal Options

- Agency V presented two potential collaboration paths for Hawksoft to consider moving forward
- The first option involves Agency V creating a comprehensive proposal with pricing for a done-for-you monthly subscription service
- The second option offers Agency V's assistance in helping Hawksoft build their own training curriculum with shared knowledge and guidance
- Both approaches aim to leverage Agency V's expertise while accommodating Hawksoft's preferences and resource allocation
- The partnership structure would formalize the relationship and ensure continued development of Hawksoft-specific training resources

Next Steps

- The meeting participants agreed to pursue one of two collaboration routes, either a paid subscription service or a collaborative build approach for the training curriculum
- Dan will follow up with a detailed proposal based on the preferred partnership structure
- The webinar program for trained VAs will be reestablished with proper coordination between both organizations
- Agency V will work with Hawksoft to identify the appropriate contact person for managing the ongoing partnership relationship and webinar scheduling
