

The Opportunity

Hawksoft agencies hire talented professionals — many without an insurance background — and face extended ramp-up periods, knowledge inconsistencies, and reduced confidence in client interactions. There is no standardized, Hawksoft-specific training solution in the market today.

AgencyVA has already built one. Our Agency V University LMS delivers structured, role-ready training across all major lines of insurance — built entirely around the Hawksoft platform. Together, we can put this solution in the hands of every Hawksoft agency.
